- Agenda
- Revised 2017-18 Salary Schedule
- 2017-18 Operating Budget

Questions/Concerns:

Many members show concern about not having access to iPads and Canvas. Paras are being asked to support students on the iPads with Canvas. There has been no training for Paras. It's also a concern that building administration is uploading weekly newsletters and other Documents that classified staff can not access.

Answer:

The concern of training on iPads was brought forward to the district by the association. The association was told that training concerns should be taken to building administrators. If there is a need, the administrator should work with individuals needing the training. The district does not provide a group training. Canvas is individualized for students and contains private information, therefore individuals other than the student should not have access. If you have a concern about newsletters being uploaded to canvas, contact the administrator. Newsletters may be uploaded for student and parent access.
